

CITY OF WASHINGTON, ILLINOIS
Committee of the Whole Agenda Communication

Meeting Date: March 10, 2025

Prepared By: Jon R. Oliphant, AICP, Planning & Development Director

Agenda Item: Residential Poultry Consideration Discussion

Explanation: The City's residential poultry regulations were adopted in October 2019. This allowed for poultry on certain residential properties following approval of a special use. The underlying regulations that were adopted are attached. A special use allows for other conditions to be applied above and beyond the underlying regulations on a case-by-case basis if desired.

An attached ordinance was approved in September 2020 to prohibit chickens from being located on residential properties in the city limits. Chickens are currently only allowed on properties zoned AG-1 (Agriculture).

Fiscal Impact: The original regulations required a special use permit, which carry a \$100 fee. Approval of the special use to allow chickens then required obtaining a building permit and to acquire an annual \$25 chickens permit.

Action Requested: The consensus of the Council at the February 3 City Council meeting was to place an item on the March Committee of the Whole agenda to see if there would be any interest in adopting a future ordinance to allow for residential poultry. Staff requests direction on the potential drafting of such an ordinance.

ORDINANCE NO. 3347

(Synopsis: Adoption of this ordinance would allow no more than five chickens on any residential lot subject to the acquisition of a special use permit. A building permit would be required to construct the coop and the chicken enclosure could be located no closer than ten feet from a side or rear lot line and at least 25 feet from an adjacent residential structure.)
