TECH FEE			5.50	(5)
Previous Balance Due			73.50	(6)
by 15th of month to av	oid termination			
		TOTAL	142.40	

NOTES

- (1) The Service From and Service To dates are indicated at the top so you can calculate how many days the bill represents. In this instance, the bill is for 42 days.
- (2) The water charge is calculated as the water consumption divided by 1,000 times the water rate

4,717 / 1,000 = 4.717 * \$4.12 per 1,000 gallons = \$19.43

(3) The sewer charge is calculated as the water consumption divided by 1,000 times the sewer rate

4,717 / 1,000 = 4.717 * \$8.58 per 1,000 gallons = \$40.47

(4) The water only charge is calculated as the water only consumption divided by 1,000 times the water rate, however, the minimum monthly usage of 850 gallons applies if usage is less than 850.

Consumption is less than 850 gallons so minimum applies as follows:

850 / 1,000 = .850 * \$4.12 per 1,000 gallons = \$3.50

- (5) The technology fee is assessed as \$3.85 for one meter and \$5.50 for two meters such as the case with someone with a water only meter
- (6) The previous balance due refers to the balance from the previous month. Depending on when this payment is made, the bill may not reflect the payment and show a previous balance. An account is only subject to termination if the balance from the previous month has not been paid by the 15th of the current month. The current month's balance is not due until the end of the month. Please note that a second/pink/shutoff notice will not be sent.
- Exception: The rates above are for regular water and sewer rates. You may have a different rate if you qualify for the senior citizen or circuit breaker rate or if you live outside the corporate limits.
